PROFILE

Frontend Developer with 4+ years of experience in React, Next.js, and TypeScript, and a Bachelor's degree in Software and Information Engineering. Adaptable and reliable, with a track record of delivering across different industries — from SaaS and fintech to business automation tools. Hands-on experience with Vercel and Netlify for deploying scalable applications. Comfortable picking up new domains quickly and committed to clean, maintainable code. Available for remote work with flexible overlap across time zones.

WORK EXPERIENCE

REACT FRONTEND DEVELOPER

Stealth Startup (fintech, NDA)

August 2025 - Present

- Developed and delivered robust frontend solutions with a focus on scalability, performance, and code quality, contributing to the continuous improvement of product stability and user experience.
- Built and maintained reusable component libraries, accelerating development efficiency and ensuring consistency across multiple features and projects.
- Drove UX and performance optimizations, reducing load times and improving responsiveness, leading to higher user engagement and retention.

FRONTEND DEVELOPER

TokenFlow

April 2024 - August 2025

- Maintained high code quality and system reliability through structured code reviews, comprehensive unit testing, and integration testing practices.
- Developed and optimized 30+ reusable UI components while collaborating with cross-functional teams to deliver custom smart contract solutions.
- Led UX enhancements that streamlined user flows, reduced load times by 30%, and significantly improved overall product usability.

FRONTEND ENGINEER

ScaleRoad

November 2022 - April 2024

- Implemented frontend logic for subscription and usage-based billing flows, including invoice display, upgrade/downgrade paths, and failed payment handling.
- Improved checkout UX by reducing the number of steps and adding inline validation, lowering abandoned transactions.
- Built reusable billing dashboard components later reused across other parts of the platform.

FREELANCE WEB DEVELOPER

Freelance

July 2020 - November 2022

- Delivered 25+ production-grade web applications using React, Next.js, and TypeScript, improving site performance by up to 30% through optimized architecture and responsive design.
- Translated client requirements into scalable, user-focused interfaces, with many clients returning for follow-up projects and long-term collaboration.
